PolyMet Permitting Update

September 26, 2018

DNR - DNR receives revised application from PolyMet for a permit to take endangered and threatened species

The Minnesota Department of Natural Resources has received a revised application from PolyMet for a Permit to Take Endangered or Threatened Species.

Barr Engineering and their subcontractor Salix Environmental recently conducted rare plant surveys to inform PolyMet's revised application for a Permit to Take Endangered or Threatened Species. The surveys focused on floating marsh marigold (*Caltha natans*), as well as several species of moonwort (*Botrychium*). In advance of this field

work, DNR reviewed and approved a plant survey work plan. The surveys were completed on June 20, and DNR has approved the final survey report.

The DNR is currently reviewing [PolyMet's revised application](#) for a permit to take floating marsh marigold (*Caltha natans*), upswept moonwort (*Botrychium ascendens*), and spatulate moonwort (*Botrychium spathulatum*).

For the latest information on the PolyMet NorthMet project go to the DNR [PolyMet Permitting Page](#).
